- Node.js, Express, Python
- Git, GitHub, Linux Terminal
- Jest testing, Figma, Kanban

LANGUAGES

- **ITALIAN (NATIVE)**
- **ENGLISH C2**

WORK EXPERIENCE

Front End React Developer   2021 - Now
Freelance at emanuelefavero.com

Own Company | Whitenoise   2013 - Now

Developed, curated, and sold over 200 digital products with Max(MSP), Reaktor, and JUCE plugin technologies through my own company. Established exclusive partnerships with industry-leading companies, including Native Instruments (sounds.com) and Beatport

MAJOR REACT PROJECTS

Pineapple Ecommerce

Developed a full stack iPhone e-commerce platform using Next.js (React Framework), Stripe for payments, and Sanity as the CMS. Products added via Sanity's dashboard are displayed after scheduled revalidation to save resources.

Compare NBA Players

Developed an innovative NBA statistics website that allows for side-by-side player comparisons using Chart.js (React Library) for data visualization. Integrated a paid NBA API for fetching statistics and used Next.js for the front end.

Facebook-like Social Media

Developed a Facebook-style social media platform using the MERN stack (MongoDB, Express, React, Node.js). Features include authentication with Passport, login, friend following, comments, likes, posts, and a Facebook-like homepage.
